Fill in the Squares – Addition 1-9

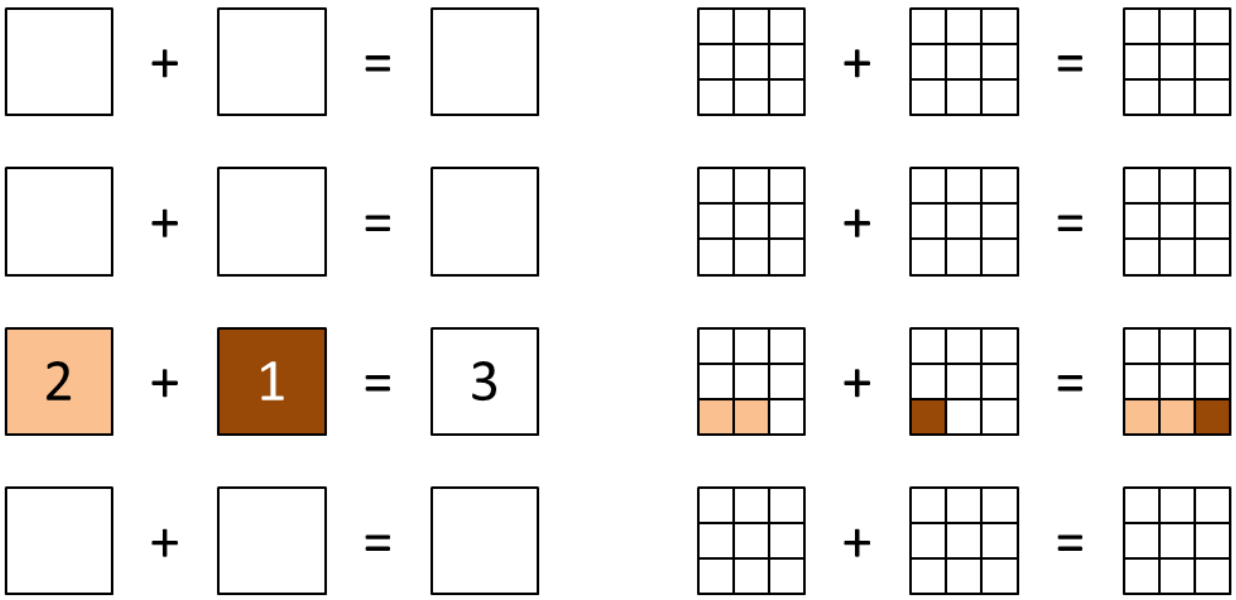
Math Exercise Sheets, 6-8 years, 10min/sheet

These exercises help children to understand how small numbers work: 1) What amount does each number present, 2) what is zero, 3) how the two numbers in addition can change place, and 4) how the numbers can be added. Coloring the squares makes addition more tangible both visually and kinesthetically.

Math Exercise (6-8 years, 10 minutes)

TASK: Write down all the additions that give the same result.
a) Fill in the numbers on the left.
b) Color the boxes on the right.

NOTE: You can use the iPad app "NumberRings" to look up which additions give the same result.



Math Exercise (6-8 years, 10 minutes)

TASK: Write down all the additions that give the same result.
a) Fill in the numbers on the left.
b) Color the boxes on the right.

NOTE: You can use the iPad app "NumberRings" to look up which additions give the same result.
